VISITOR GUIDELINES

For adult inpatients with COVID-19 and adult persons under investigation for COVID-19 who remain under isolation.

The person you want to visit has COVID-19 or is being tested for COVID-19 because of their symptoms. Visiting this person puts you at risk of getting the virus. It can cause:

- Fever
- Headache
- Chills
- Body aches
- Shortness of breath

Wearing the personal protective equipment (PPE) we have given you can lower your risk. Your risk is greater the closer you are to the person and the more time you spend with them.

We have tried to take as many precautions as possible so you are able to see this patient. You must also:

- Wear the PPE you are given
- Not touch your face
- Wash your hands

By visiting this person you acknowledge that you assume the above risks.

GUIDELINES

- One approved visitor may visit each day during the admission. This person must be listed in Epic as an “approved visitor.”
- The approved visitor is allowed to visit between the hours of 9 a.m. and 5 p.m.
- If the patient is in isolation, the approved visitor is the only visitor allowed for the duration of the patient’s isolation.
- Visitor is not allowed in the patient’s room during aerosol-generating procedures.
- Visitor may not eat or drink in the patient’s room.
- Visitor may not use the patient’s bathroom.
- Visitor may also stay in touch with the patient by phone, video, or updates from a unit navigator.
- Visitor must wear a N95 respirator, gown, gloves, and eye protection at all times when with the patient.
- Visitor must wear a face mask at all times when inside the building.
