VISITOR GUIDELINES

For adult inpatients with COVID-19 and adult persons under investigation for COVID-19 who remain under isolation.

The person you want to visit has COVID-19 or is being tested for COVID-19 because of their symptoms. Visiting this person puts you at risk of getting the virus. It can cause:

- Fever
- Headache
- Chills
- Body aches
- Shortness of breath

Wearing the personal protective equipment (PPE) we have given you can lower your risk. Your risk is greater the closer you are to the person and the more time you spend with them.

We have tried to take as many precautions as possible so you are able to see this patient. You must also:

- Wear the PPE you are given
- Not touch your face
- Wash your hands

By visiting this person you acknowledge that you assume the above risks.

GUIDELINES

- Two approved visitors may visit each day during the admission. These people must be listed in Epic as “approved visitors.”
- The approved visitors are allowed to visit between the hours of 9 a.m. and 8 p.m.
- If the patient is in isolation, the two approved visitors are the only visitors allowed for the duration of the patient’s isolation.
- Visitors are not allowed in the patient’s room during aerosol-generating procedures.
- Visitors may not eat or drink in the patient’s room.
- Visitors may not use the patient’s bathroom.
- Visitors may also stay in touch with the patient by phone, video, or updates from a unit navigator.
- Visitors must wear a N95 respirator, gown, gloves, and eye protection at all times when with the patient.
- Visitors must wear a face mask at all times when inside the building.
