- Standard precautions‡

**Negative pressure required?**
- No

**Staff and support people may cover more than one room with proper donning/doffing of all PPE**
- Yes

### Footnotes
- *Diagnosis of COVID-19 was within 180 days prior to procedure AND patient is not in COVID-19 isolation.
- †If pre-procedural test result is negative during the procedure, change to guidelines for asymptomatic patient with negative test.
- ‡Standard precautions unless in isolation for another reason.
- §If someone must enter the room during the 60-minute period, they must wear an N95 respirator. Cleaning should not begin until 60 minutes have passed.
- ¶If someone must enter the room during the 60-minute period, they must wear an N95 respirator, gown, glove, eye protection. Cleaning should not begin until 60 minutes have passed.

NOTE: Wherever “N95 Respirator” is written, equivalent respirator is acceptable (i.e., CAPR)

Appropriate isolation signs should be on the door until the room is cleaned.
