# EYE PROTECTION

## CLEANING INSTRUCTIONS

1. Use a clean surface designated for disinfecting eye protection.

2. Perform hand hygiene.
   
3. Carefully wipe the inside, then the outside of the face shield or goggles using an approved cleaner/disinfectant.

4. Inspect for damage.

5. Allow eye protection to fully air-dry.

6. Clean/disinfect the work surface with approved cleaner/disinfectant.

7. Remove gloves.

8. Place eye protection in clean location labeled with health care worker’s name.

---

- Smaller face shields/goggles may be stored in an envelope.*
